1.1 Definition (Gadget). A *gadget* is a thing.
Each gadget comes equipped with some data.

This is some text between two theorem-like environments.

1.2 Example (Gadget). A set is a type of gadget.

1.3 Remark (Some remark). Now, let's consider some remark.

1.4 Theorem (Test Theorem). Let $f: \mathbb{Z} \rightarrow \mathbb{Z}$ be a function such that

$$f(x) = g(x) \quad \forall x \in \mathbb{Z} \tag{1}$$
